² One may see at a glance how reversed in their colours are the Tattvas, as reflected in the Astral Light, when we find the indigo called black.

 $^{^{\}mathbf{3}}$ The colours, I say again, do not here follow the prismatic scale — red, orange, yellow, green, blue, indigo, and violet — because:

⁽a) the latter is false reflection, a true Maya; and

⁽b) the order of our scale is that of the spiritual spheres, or seven planes of the Macrocosm.
